

## English Ideas for Foundation Week 11

This week is 'National Insect Week' and so we thought it would be interesting to find out all about insects that live in our country. We have made a fact sheet for you to read with your children, or you can search for the insects they want to find out about using some of the websites below. Each day we will look at a new insect and write a fact about it on the fact file sheet included on our home learning page. The top box is for writing the name of the insect, then there is a box for a picture, either drawn or printed, then a box for writing the fact. If the children want to write more than one fact they have learnt, brilliant!
