

Last half term we asked you some questions about E-safety

Here's the advice we would like to give you...

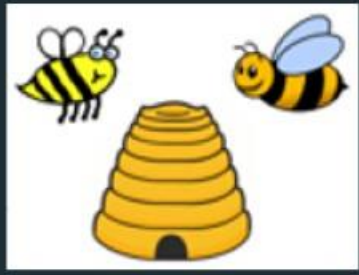

How many people play  
online games?

41 / 62 children said yes.

What else could you do with your time?

## How many children spend more than 1 hour on electronic devices

*28 / 62 children said yes.*

Spending too much time Infront of screens can:

- Damage your eyesight
- Give you a bad posture
- Limit your social interactions with real human beings
  - Make you addicted on screens

How many children click on pop ups when online?

9/ 62 children said yes.

You should never click on pop up's as they can be unsafe. You never know what site it will take you to. If you are unsure, ask an adult.

How many children tell their parents when they go online?

25/ 62 children said yes.

You should **ALWAYS** tell an adult when you go online. Tell them:

- What site you are going on
- If you see anything that makes you feel uncomfortable

And make sure they can always see you when you are online.

Thank you for listening to our advice!
