

# Honey Bee

In Honey Bee, our topic has been 'Let's explore Ab Kettleby' and we have done exactly that! We have enjoyed learning the geography of our school grounds and the surrounding area. We have looked at aerial photographs and created maps as well look at the History of the village and importance of the local church.

We have been creating some fantastic writing using Fantastic Mr Fox as a stimulus and allowing us to adapt it using our own characters. We have also looked at the importance of instructions and how we lay them out. This allowed us to write a set of instruction on how to prepare a delicious feast!

In Maths Year 2 have learnt place value of 2-digit numbers, ordering, comparing and even adding these numbers together! We have used a variety of resources to help us, including dienes and tens frames. Year 3 have learnt place value of 3-digit numbers and worked on their confidence to use the column method when adding two 3-digit numbers together. Mr Dash has been very mean to us by giving lots of challenging problems to really make us think!

We have become scientists this half term, investigating different world habitats and living things. We have learnt

the 7 life processes and the basic needs of all living things. We went on a Microhabitat hunt and identified different living things in our school grounds.

In computing we have learnt about E-safety and staying safe online. We then used Microsoft PowerPoint to create our own presentations and present to the rest of the class.

We have been very creative this term with our Art and DT. We have mixed paints, drawn a self portrait and even created a shoebox model farm!

What a fantastic and fun half term we have had! I wonder what the next one will have in store...
