

Honey Bee Spring 2 Review

Our topic has been 'Up In The Trees' which we have learnt through the study of Rainforests. We have looked at climates, identified the equator and discussed why some countries are hotter and some countries are colder. We have enjoyed comparing the Amazon Rainforest to Sherwood Forest. Many Honeybees have decided they want to be Rainforest explorers and discuss new species! During this topic we have created different collages using water colours, paints, tissue paper, cardboard and even string!

In English we have looked at The Great Kapok Tree, a wonderful story about the Rainforest and why it is so important to our world. We enjoyed writing about the setting and then innovating the story using a wide range of spag. Honeybee class looked at prepositions, fronted adverbials and direct speech and managed to apply this to their writing! Very Impressive!

In Maths, we have looked at Fractions, in year 2 we have looked at halves, quarters and thirds and even looked at the link to our division when finding fractions of amounts. Year 3 have deepened their knowledge by looking at tenths and decimals. It has been challenging but we have enjoyed Maths this half term.

In Computing, we have rated and reviewed websites. This involved scanning QR codes and then rating what we liked and what could be improved about different websites. We also enjoyed discussing which websites were more suited to children and which were more suited to adults. We then used our IT skills to group objects, shapes and lines and accompany them with text to explain what we had created.

Science has involved investigating materials, looking at their properties and why we use different materials to make different everyday items. We enjoyed testing which materials we could change through squashing, squeezing, stretching and twisting!

We have been practising Cricket in PE this half term. This has involved throwing, batting and fielding. We have practised our skills and trained for Dynamos Cricket.

We have also enjoyed World Book Day 2023, we all dressed up as words and took part in lots of fun activities! This included reading with our parents and creating our own 'You Choose' story. To help celebrate our love for reading, we enjoyed having the author Pippa Goodhart come and talk to us about life as an Author and how she got there.

And now we wait to see what the summer will bring!
