

EYFS Maths, Week 6

This week we are going to learn about numbers 16-20, one a day, so that we can work with numbers up to 20 in our maths challenges from next week onwards! Unfortunately, there's a problem getting these Number Blocks episodes on YouTube, and they're not currently available on iPlayer, so I will just include the Number Block songs where I can find them. I will be including lots of variations of learn I have added activities to Education City that link with this week's learning. This is not compulsory but a great little add on.

Day 1 – Watch ‘Number Blocks – Sixteen’ song (<https://www.youtube.com/watch?v=5HmusXTjN6w>). Choose one of the options below to consolidate the number 16.

Day 2 – Seventeen https://www.youtube.com/watch?v=OXiGdG65x_s. Choose one of the options below to consolidate the number 17.

Day 3 – Eighteen <https://www.youtube.com/watch?v=Se2qTzp1Dw>. Choose one of the options below to consolidate the number 18.

Day 4 – Nineteen <https://www.youtube.com/watch?v=LGNiocFTyBQ>. Choose one of the options below to consolidate the number 19.

Day 5 – Twenty https://www.youtube.com/watch?v=dVg-Or_Z5B4. Choose one of the options below to consolidate the number 20.

The activities included to practice these numbers are:

- Football representations game. I have included this again, but would recommend not using all of the numbers as there's a lot! Turn all the representation footballs over, and choose a number goal. Take it in turns to turn over the footballs, and if it's your number, you've scored as goal! First to 5 goals wins.
- All about ... worksheet. Similar to what we've been doing the past week, but not so much to it! Choose for the number you're on.
- Number activity mats – similar to the worksheet but with a practical side too.
- I Spy & Count to 20 – see how many of each food you can find in the sheet, and record it using the numbers you know.
